About Us

Bachelor of Biology Education emphasizes the practical use of biological science and teaching skills within agroecosystem environments. Students are empowered to accurately identify biological resources and design effective learning strategies relevant to industrial agriculture. Our graduates possess strong scientific understanding, environmental awareness, and problem-solving skills directly applicable to modern agroecosystems.

Our Profile

Our Vision

To be a globally recognized and internationally reputable undergraduate biology education study program, driving innovation in the field and supporting sustainable industrial agriculture.
